

The Morgan Independence™ Trike & Hoist

Barry Morgan the inventor of The Morgan Independence™ has suffered with Multiple Sclerosis for many years. During this period he utilised various tools and systems to ensure his continued freedom. However, eventually; as with many Multiple Sclerosis sufferers, Barry's condition deteriorated to the point where he was unable to use even a manual wheelchair. Looking around the market Barry quickly found out that the only alternative available to him was an expensive 'power chair' which required serious investment. This is because not only would Barry have required a new vehicle, but also expensive adaptations for that vehicle too.

This seemed a very costly and inelegant solution to Barry, so he took it upon himself to design and build his own mobility system, one that could bypass the expense of the other options. After some serious thought and determination Barry came up with the Morgan Independence™ Trike and the associated Hoist. The system can be used with nearly all production cars, is very lightweight (both Trike and Hoist weigh only 28 Kilograms), and is so compact that it can even be taken on an aeroplane or used with the 4-seater smart car!

The Trike itself is very durable, comfortable, lightweight and most importantly, nimble. It will allow you to get about your home, local area, or shopping centre with ease. However, when used in conjunction with a car, it has no distance limitations at all. The Hoist attaches to your vehicle's roof rack and the Trike then connects to the Hoist with an easy to use clamp. From there you could drive to Romford via Rome and back again with no trouble at all. If your car can get there, the Morgan Independence™ system can get there too.

“As someone who has seen first hand the huge difference regaining your independence can make to a person I hope that you find the freedom the Morgan Independence grants as exciting as we here at Hopkins Morgan do. I also hope that the Morgan Independence will prove to be just what you're looking for in order to help you remain completely independent”

John Hopkins
(Director)

The System

- **Hoist:** £3490 + VAT
 - (Including free Trike)
- **Trike:** £1995 + VAT (individual)
- **Hoist:** £3490 + VAT
 - (Adapted to alternative scooter)
